Provider and Specialised Equipment
Provision Specialists

What is an Occupational Therapist?

- Occupational therapists (OTs) aim to help individuals gain or regain skills which are essential for that person's happy, safe and meaningful existence.
- OT's are skilled in functional assessment and rehabilitation, promoting independence in tasks at home, work, school and leisure.
- OT's work with people to help them achieve goals and outcomes that are important to them and their lifestyle.
- ADL Health's Occupational therapist aims to increase the independence and functional performance in all activities of daily living, work and leisure tasks of all clients referred to their services.
- We have a goal to work closely and in conjunction with the client, their family/friends and other health workers to achieve the best outcome possible.

What Services does the ADL Occupational Therapist Provide?

Services offered at ADL Health that would be available to you include (but are not exclusive of) the following:

- Specialised Seating & Mobility Assessments
- Home Assessment & Modification
- Equipment Prescription & Provision
- Work Rehabilitation Facilitation
- Other Occupational Therapy Specific Intervention
