If a modification is necessary to achieve your cushion or backrest dimensions, do you want customer service to notify you prior to placing this order?

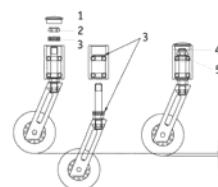

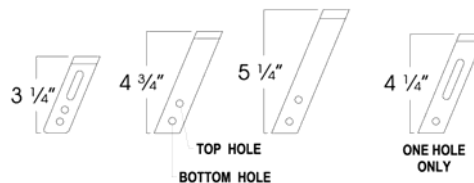

Please Choose

- Order modification and charge as per Jay price list?
- Send Quote only when a modification has a charge
 - Fax me # _____
 - Email me _____

* Please see Jay Price List for latest pricing information. Also, note that Jay cushions and backs may ship from different distribution centers.

*For rear seat height
Subtract 2" (2" squeeze) or 3"
(3" squeeze) from front seat height.

1. Remove caster cap
2. Remove stem nut
3. Remove entire stem assembly and move desired number of washers from inside caster housing as shown
4. Replace stem assembly into housing
5. Replace caster stem nut and tighten to 100 in. lbs.

Note: The front seat height may be raised by moving the washers stored inside the caster housing to the bottom of the caster housing as shown. Each washer moved into this area will raise the front seat height by .06". If the rear wheels are set to have camber, raising the front seat height will increase toe-out, lowering the front seat will increase toe-in.

Rear Wheel Diameter	R2 Caster and Fork Combinations			Front Seat Height
